

Change Guides' Change Management Certification is an ACMP's Qualified Education Provider™ (QEP™) Program

Change Guides is happy to announce that our **Change Management Certification Program** has been approved as an ACMP's Qualified Education Provider™ (QEP™) Program indicating that our program aligns to ACMP's Standard for Change Management and adult education best practices.

This means the Change Guides' **Change Management Certification Program** completes the first part of the requirements to earn your **Certified Change Management Professional™ (CCMP™)** credential of a minimum of 21 hours of formal education aligned with The Standard. After completing our class, you have two additional steps to meet the CCMP requirements:

- A review of their change management experience and initiatives
- Successful completion of an examination based on The Standard

ACMP's Certified Change Management Professional™ (CCMP™) credential recognizes the education, experience and skills for a change management practitioner to effectively manage change.

Practitioners earning the change management credential have demonstrated a commitment to following the practices, processes and strategies in the ACMP Standard for Change Management, and to professional development in achieving the right skills and experience for the profession.
